Hi Phil:

I have been talking w/ IRU folks about your requirements for this project. One thing I have noticed is that no one requested that ArcGIS be installed on either of the laptops that are going up there. If that was an oversight, you might want to correct it ASAP. Also, I believe I mentioned during the call that we cannot get our GIS data through the firewall, even w/ a token. An alternative is to use the Citrix client and do GIS over that. I will be testing it tomorrow at home (haven't tried it for a couple of months) to see if it is stable enough to use. Let me know if you want to explore other options.
